Experience

Software Engineer I - Chewy+ Loyalty Team June 2026 – Present
Chewy *Boston, MA*

- Ship 50 PRs across 10 repositories and review 260 PRs across 30 in under 4 months for Chewy+ membership
- Redesign the Chewy+ landing page and member dashboard (V4) across 12 PRs, building a pricing hero with a sticky trial CTA, CMS-driven savings, benefits, and FAQ sections, a member-quotes carousel, and Virtual Vet and free-shipping benefit sheets, with new Playwright E2E coverage replacing the V2 suites
- Deliver Sampling V2 free-item autoship promotions and build its free-sample filtering UI for web and mobile, with pet type and category facets, checkbox selection behavior, and filter pass-through to the backend via GraphQL
- Power Chewy+ upsells in Cart, Checkout, and Autoship, migrating plan and eligibility data from REST to GraphQL across 9 PRs with fail-closed validation and adding Virtual Vet eligibility and gift-card disclosures
- Complete Dynatrace config-as-code dashboards and alerts for 4 loyalty services, harden production service endpoints, and add lint and type-check gates to CI

Associate Software Engineer - OpenShift AI Dashboard Team December 2024 – June 2026
Red Hat *Boston, MA*

- Led the MLflow experiment tracking UI integration into the OpenShift AI dashboard across 2 repositories and 15+ PRs, delivering iframe rendering, dark mode sync, design token overrides, and feature-flag-gated rollout
- Resolved a 4-month-open CI integrity gap that had allowed numerous PRs to merge without passing mock tests by adding pass/fail validation to the GitHub Actions workflow and a required context to the Prow Tide merge bot
- Reduced production container image size by 52% by re-engineering the monorepo build pipeline
- Integrated the upstream Kubeflow Model Registry into the dashboard, built module federation extensions for model serving, and migrated routes and Cypress E2E tests to upstream API patterns across 15+ contributions
- Drove AI-assisted development adoption by building review skills for Jira ticket validation and RBAC policy verification, an agent-first documentation system, and reusable agent rules for the team

Software Engineer Intern - OpenShift AI Dashboard Team May 2024 – August 2024
Red Hat *New York, NY*

- Shipped 23 PRs, fixing an authorization vulnerability that exposed notebook event APIs to unpermitted users, resolving pipeline scheduling failures in Firefox, and adding cluster-admin group support to the administration tab
- Built MLMD request interception for Cypress E2E tests, authored pipeline execution test suites, created ESLint rules, replaced type assertions with type guards across the codebase, and removed thousands of lines of dead code

Software Engineer Intern - ConsoleDot Team May 2023 – July 2023
Red Hat *Remote*

- Shipped 41 PRs in 3 months, generating 25+ search index entries across the Red Hat Hybrid Cloud Console's global search for services, improving search result relevance
- Built WebSocket payload validation, authored Cypress E2E tests, implemented a bulk select/deselect toggle for notification preferences, and fixed responsive UI bugs across mobile viewports

Projects

Transit Tracker | trackthemetro.com April 2026 – Present

- Build a GTFS transit platform with 6 NestJS microservices, a Next.js frontend, PostgreSQL/PostGIS, Redis, and NGINX, featuring full-text route search, real-time departures, and nearby-stop geolocation
- Implement CI/CD with quality gates spanning unit, integration, contract, accessibility, and E2E tests, GHCR image publishing, and automated Hetzner deployment via SSH

Education

University of Virginia Charlottesville, VA
Bachelor of Arts in Computer Science, GPA: 3.9/4.0 *August 2021 – December 2024*

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML/CSS, C, R, Swift
Frameworks/Tools: React, Next.js, Node.js, GraphQL, PatternFly, Webpack, Module Federation, Docker, Kubernetes, GitHub Actions, Cypress, Playwright, Jest, Dynatrace, PostgreSQL, Redis, Claude Code
